UI/UX Designer with 6+ years in frontend development, specializing in Angular, dialog-driven workflows, and responsive design. Skilled in translating user needs into intuitive interfaces and collaborating across teams to deliver seamless experiences, and currently pursuing an MSc in Software Engineering to deepen design and architecture expertise.

KEY SKILLS

Design & UX
- Wireframes, user flows, responsive layouts, Angular Material, PrimeNG, Streamlit

Frontend Development
- Angular 11+, JavaScript, TypeScript, HTML, CSS, Dialog-driven UI, branded login interfaces

Tools & Collaboration
- Git, GitHub, GitLab, Azure DevOps, Agile (Scrum, Kanban), stakeholder communication

---

PERSONAL SKILLS

- Customer-focused communicator with strong problem-solving abilities
- Reliable team player with Agile experience and mentoring skills
- Quick learner, adaptable to new tools and workflows
- Organized multitasker, balancing development, support, and documentation
- Professional communicator with experience in stakeholder collaboration and documentation
- Calm under pressure, able to troubleshoot and resolve issues in fast-paced environments

---

PROFESSIONAL EXPERIENCE

CAMMS – Colombo, 01, Sri Lanka   Jan 2022– June 2025

Software Engineer III

Core Data Project (Post-Merger with Riskonnect)
- Designed entity relationship diagrams (ERDs) to define scalable system architecture
- Initialized database schemas, including table structures and relational mappings
- Developed SQL population scripts to seed initial data, streamlining deployment setup

CAMMS RISK, CAMMS.Incident, CAMMS.Compliance

Enterprise-grade modules supporting organizational decision-making and risk management.
- Delivered L2/L3 support for multiple product lines, resolving complex client-reported issues via Freshdesk with a 95% satisfaction rate
- Implemented feature enhancements using Angular, .NET Core, and Entity Framework Core
- Refactored source code and optimized stored procedures, reducing load times by up to 60%
- Maintained high-quality releases with zero post-deployment defects across multiple modules
- Contributed to both Kanban and Scrum teams, supporting sprint planning and backlog grooming

- Delivered up to 75 story points per sprint, consistently meeting weekly targets
- Collaborated across cross-functional teams to ensure timely, scalable, and secure deployments

RN Solutions - Colombo, Sri Lanka,   May 2020 – Nov 2021
Software Engineer

- Authored Software Requirements Specification (SRS) to define system scope and functionality
- Built stakeholder platform UI using Angular and PrimeNG, reducing onboarding time by 30%
- Designed ER diagrams, class diagrams, and RESTful APIs using ASP.NET Core

JKIT PVT LTD - Colombo, Western Province, Sri Lanka   May 2019 – May 2020
Associate Software Engineer

- Developed and maintained enterprise applications for SupplierMate and Ceylon Tobacco Company
- Migrated Xamarin mobile app to .NET Standard, increasing code reusability and reducing maintenance effort by 40%

Dialog Axiata PLC - Colombo, Western Province, Sri Lanka   Nov 2017 – May 2018
Trainee Software Engineer

Training Division: Network Operations & Service Assurance – Service & Network Assurance – Technical Help Desk
- Assisted in developing a chatbot to enhance customer support services.
- Conducted VPN network troubleshooting and simulations using CISCO & Huawei devices.
